General Guidelines:

- A) This form should be used to record an animal one time and one time only. Once an animal is recorded in the ABAA database and a database number assigned, there is no need to use this form for that animal again.
- B) Animals to be recorded on this form include:
 - 1) **Commercial or Crossbred:** Animals not registered in another association and are made up of other straight breed combinations.
 - 2) **"Other Breed":** Animals already registered in another association. These animals are typically utilized in a breeding-up Blonde D'Aquitaine program.
- C) This form must be completed prior to recording progeny produced for the first time by commercial, crossbred or "other breed" parents. An ABAA database number will be assigned to these parent animals and this number will be used to register Blonde D'Aquitaine progeny
- D) Complete all Boxes which are applicable: Boxes marked with **R** are required fields
- E) Applications must be typed or printed in ink.
